

Estine van der Berg

SOFTWARE ENGINEER – BOOTCAMP GRADUATE

PROFILE

I come from a Beauty and IT Recruitment background which I believe has given me a unique set of skills, such as patience, perseverance, effective communication, innovation and working well under pressure. During this Bootcamp, I have discovered my fierce love for writing code and can honestly not imagine doing anything else for the rest of my life. My aim is to complete my Bootcamp, create an awesome portfolio and get an opportunity as an intern or junior software developer. As I am at the start of my exciting new career I am open to all kinds of sectors in order to expand my experience and to get to know the industry.

PROFESSIONAL EXPERIENCE

Software Engineering Bootcamp

HYPERIONDEV

March 2020–June 2020

I have completed my studies with HyperionDev. It was an intensive 3 Month Bootcamp where I immersed myself in learning.

I have gained a lot from this course focusing on teaching the fundamentals of thinking like a software engineer. Changing your entire mindset can be difficult and I have found it to be a very welcome and challenging experience, I now find myself thinking in an if/else narrative.

Skills & Technologies: Python, Java, SQL, Git, TDD, Eclipse, VSCode, Pandas, NumPy, Matplotlib, OOP, CSS, HTML

Senior Key Accounts Specialist

CLOUDSTREAM GLOBAL (TECHSTREAM GROUP)

Sept 2019 – Feb 2020

I was focused on recruiting top tech talent from around the globe and placing them in to the MENA market. Worked in Agency Recruitment, mainly with Software Engineers/Developers and Data Scientists from across the globe and placing them in sought after positions in the UAE.

The skills I developed in this position are vast, especially when it comes to communication, organization and negotiation. I was responsible for keeping in contact with my clients, and ensuring that all of their hiring needs were met in a timely manner. I was also responsible for finding and sometimes relocating top tier candidates from all over the world, being by their side for every step of the way.

Internal Talent Specialist

GLOBAL KINETIC

Aug 2018 – Aug 2019

I worked for this incredible Software Engineering company as an internal recruiter. I gained a lot of insight into what it takes in order to develop great software. I loved every minute of working at GK. I sourced, screened and interviewed technical candidates for GK (Software Engineers, QA Engineers, Technical Support, BA, PM etc.)

I also had general HR functions, such as organizing events (Halloween, Quiz Night etc.) and outputting a quarterly newsletter with the team.

Talent Associate

CLOUDSTREAM GLOBAL

Jan 2017 – Jul 2018

I was focused on recruiting top tech talent from around the globe and placing them into the MENA market. I had to source candidates and screen them for relevant vacancies as well as do Business Development to broaden the team's client base. Mainly working with Software engineers and Data Scientists, but touching on other technical roles as well.

EDUCATION

Software Engineering Bootcamp

HYPERIONDEV

March 2020 – June 2020

Certificate Diploma in Photography

THE PHOTOGRAPHY INSTITUTE

2015–2016
